

Cleaning Firms

Ensure service quality
Record hours worked promptly and correctly

Are your employees' time sheets correct?

Unreadable work slips and little mistakes make it more difficult for your bookkeeper to record exact information, bill customers and calculate employees' pay?

Do you notice that employees are absent only when it is too late?

Is it an angry telephone call from your customer that informs you about missing staff? Do customers take advantage of incomplete checks to dock your invoices?

Do you comply with quality standards?

How do you ensure that you are complying with your own quality standards and those of your customers? Are you, for example, certified in accordance with DIN EN ISO 9001?

Are your costs unnecessarily high as a result of payments for damages?

Can you reduce liability risks by being able to provide proof of the services you give?

Are your vehicle costs too high?

Do you know exactly where and for how long your vehicles are on the way? Even after business hours? And at the weekend?

Can you guarantee the safety of your staff?

Do some employees work on their own? Can your employees get in touch with you quickly in an emergency?

This is what the ENAIK00N telematics solutions offer:

Better scheduling

- ✘ Optimisation of work schedules by knowing what the actual situation is.
- ✘ Availability of data at all times via the Internet

Quality assurance

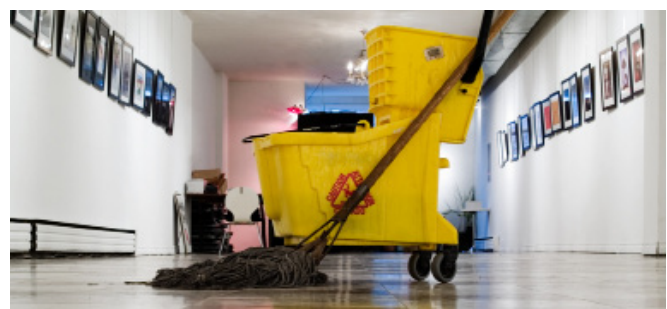

- ✘ Real-time documentation of actual hours worked allows you to respond immediately to exceptional situations
- ✘ You can immediately identify deviations from the work schedule

Forgery-proof activity reports

- ✘ Complete protocol of whether work at all locations has been processed in the right order
- ✘ Complete protocol of the time required at each work location
- ✘ Proof that services have been performed in accordance with the contract
- ✘ Proof of punctual arrival / completion of time-critical assignments

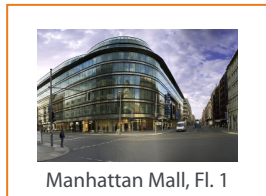

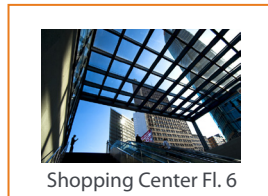

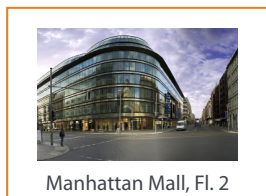

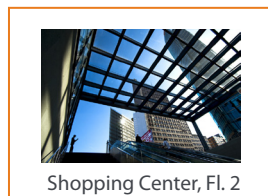

Cost reduction resulting through staff monitoring

- ✘ Identification of extra journeys, private journeys, unscheduled breaks
- ✘ Vehicle log function

ENAIK00N records, checks and documents everything to do with your employees and vehicles.

Useful extra

ENAIK00N buddy-tracker

You're on the road and want to keep an eye on things? We have the right software for BlackBerry® and Windows® Mobile phones

Trust quality „Made in Germany“

An overview of ENAIK00N telematics

- Very large selection of different telematics modules: suitable solutions for almost any application area
- Mobile telephone transmissions in real time: you always know what's going on
- Powerful, highly secure, web-based solution:
 - > No software installation required
 - > Data retrieval via any web browser - even with a mobile phone
- Automatic email reports, SMS for easy handling
- Evaluations put you in the know: Logbook, daily and weekly reports for individual drivers or machines, break times, speed profiles

Easy to use technology

- Installation of the device within minutes
- Maintenance-free operation
- Detailed manual and hotline with usual call charges

The use of ENAIK00N rfid-tracker

- **The application:** Positioning in buildings by means of RFID
- **The components:**
 - > Employee equipment: RFID compatible mobile phone
 - > Property equipment: Permanently installed RFID tag
 - > Analysis software
- **The procedure:**
 - > Equip property with RFID tags
 - > Select and equip the personnel
 - > The deployment plan of each employee is stored in ENAIK00N fleet-control-web

- **Bookings onsite:**
 - > Unambiguous registration of the employee on the mobile phone
 - > Reading of tag at the beginning of the assignment
 - > Reading of tag at the end of the assignment
 - > All recordings on site are stored and documented
- **Unambiguous registration of the employee on the mobile phone**
 - > Any reported deviations from the schedule in respect of time or place are immediately identified and logged
 - > Immediate notification by email e.g. to the team leader
 - > Fast reactions possible, e.g. personnel replacement
- **ENAIK00N fleet-control-web evaluation software:**
 - > Overview of all time- and place-related details such as beginning and end of work, length of assignment
 - > Evaluation by employee
 - > Evaluation by place of assignment / persons
 - > Integration possibilities with existing programs (e.g. scheduling and accounting software)

There are many types of RFID TAGs available
