

## ENAIKOON buddy-tracker Version 2.1

Always know what's going on –  
even if you are out of the office

ENAIKOON buddy-tracker is an application for Blackberry® and Windows® Mobile smartphones with GPS that allows seeing where your vehicles, mobile workers or goods are currently located, whether they move or stand still and how far each mobile object is away from you.

This application makes you independent of a PC in your office.

All tracking devices sold by ENAIKOON and all ENAIKOON GPS applications for mobile phones and smartphones are fully supported.

Data changes in ENAIKOON fleet-control-web are immediately reflected in the display of ENAIKOON buddy-tracker.

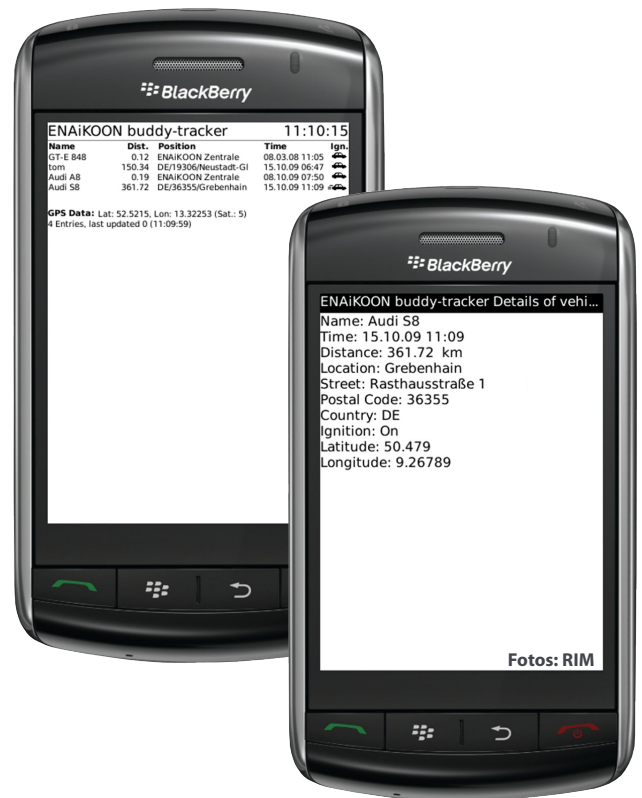

Subaccounts of ENAIKOON fleet-control-web are fully supported as well as ENAIKOON DGPS-enabler, the server side service for significant improvement of the precision of GPS coordinates.

### The application provides two views

#### Table with all mobile objects

The following information of all vehicles / mobile objects registered with a user account are shown, each one in a single line:

- Name of the mobile object
- Distance to your mobile phone
- Latest reported GPS position
- Timestamp of the latest position report
- Status „moving“ or „standing still“

#### Details of one mobile object

All available information of a single mobile object is shown in full length:

- Name of the mobile object
- Timestamp of the latest position report
- Distance to your mobile phone
- Latest reported GPS position
- Ignition ON or OFF
- Latitude of the GPS position
- Longitude of the GPS position
