

ENAIKOON driver-id Version 2.7

Inexpensive Driver Identification System

ENAIKOON driver-id is an inexpensive but very robust driver identification system which can be attached to the ENAIKOON remote control units ENAIKOON locate-04 and ENAIKOON locate-06.

This technology can be used for multiple purposes:

- **Access control**
the worker identifies himself to be authorized to use a machine, access a room etc. Without attaching his iButton to the reader, the employee cannot get the machine to work or the door to open.
- **Time recording of mobile workers**
in the beginning and at the end of a shift as well as for pauses the mobile worker attaches his personal iButton to the iButton reader and thereby clocks in or out.
- **Assignment verification**
with the iButton technology you can ensure, that e.g. a machine operator can only operate machines, he was previously trained for. Assignments can be handled from any internet capable pc.

ENAIKOON driver-id is fully supported by the ENAIKOON M2M-commserver and the web based driver logbook ENAIKOON fleet-control-web.

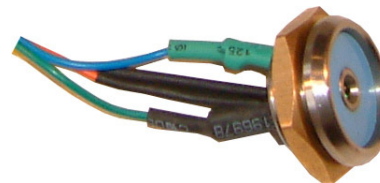

Two types of iButton readers are available:

Reader with 1 sensor

Because of its simple construction, this iButton reader can easily be mounted to a dashboard.

This iButton reader can be mounted outside a vehicle because it is weather resistant. This allows using the reader like an attendance recorder even if the machine operator is not present.

The built in LED indicates, if the reading process was successful. Optionally a piezo buzzer can be used for the same purpose. The reader is fixed with a counter nut.

Reader with 2 sensors

This iButton reader allows attaching two iButtons permanently at the same time. This can be used to record which driver and which co-driver has been using a vehicle at a specific time.

The iButton

The key fob with its worldwide unique number is called iButton. This indestructible electronic identification badge is very lightweight and can easily be attached to the bunch of keys.

Products and Prices

Product	Part No.	Product Description	Price
ENAIKOON iButton	ZUB-05-01	ENAIKOON iButton with key fob, black	10.90 €
ENAIKOON driver-id reader	ZUB-05-02	ENAIKOON driver-id reader with 1 sensor compatible with ENAIKOON locate-04 and ENAIKOON locate-06 including 2 ENAIKOON iButton 2 m (6.5 ft) cable	59.90 €
