

## ENAIKOON fleet-control-web Version 3.3

**Online Fleet Management, Driver Logbook,  
Vehicle Surveillance, Billing and Dispatching  
for Commercial Fleets of Vehicles and  
Construction Machines**

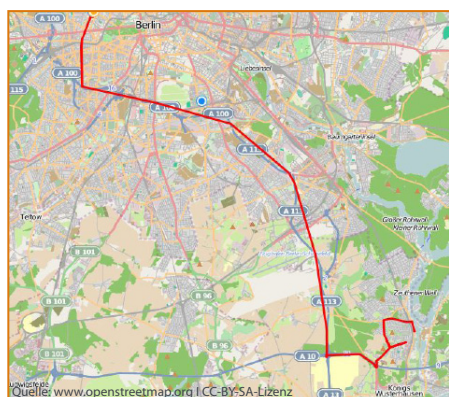

ENAIKOON fleet-control-web was designed for companies that operate fleets of vehicles: trucks, cars, construction machines. In addition ENAIKOON fleet-control-web allows tracking, monitoring and securing various other mobile objects like action forces, animals or consignments.

Handicraft companies, social services, security services, construction machine rental companies, transportation companies and many other businesses have the possibility to track, trace, dispatch and bill their mobile objects with ENAIKOON fleet-control-web.

Various reports like reports about driven routes, route details, pause times, driving behavior (speed, acceleration etc.), traffic jam situations and many more help to optimize the usage of the fleet and to bill the activities of the fleet and the mobile workers.

ENAIKOON fleet-control-web recognizes the current geo position of a vehicle very precisely by receiving GPS satellite signals from one of the ENAIKOON locate on-board-units of the ENAIKOON locate series or from a GPS capable mobile phone nearly in real time.

There is no necessity to install or update any software on the computer of the user because ENAIKOON fleet-control-web is a web based application that only requests a computer system or a mobile phone connected to the internet.

### Feature List

Multiple reports of the driven routes as well as the status of each vehicle are reported as follows:

- Report about the actual position of each vehicle (map or text based report)
- Report about all driven routes of a vehicle
- Report about all details of a driven route: when was which vehicle where, which speed had which vehicle when and where, how long was each part of a trip in regards of distance and time
- Report about all pause times of each driver
- Report about all stay times of each driver
- Report about traffic jams during certain trips
- Driver logbook (e.g. for tax authorities)
- Graphics about the driving behavior of each driver
  - Positive and negative acceleration
  - speeding
- Report about special incidents
  - When and where was the ignition switched on too long while the car was standing around
  - When and where was the vehicle driving faster than allowed
  - When and where was the voltage of the car battery below a certain level
- Transmission of commands to a vehicle (e.g. for immobilization)
- Driver identification and driver related reports
- Support of various displays connected to a ENAIKOON remote control unit
- And many more...

With ENAIKOON fleet-control-web you can configure to receive various reports on a revolving basis as an attachment to an E-Mail (e.g. every Friday at 14:45 hours). With this feature you can save a lot of time and at the same time regularly needed reports will no longer be forgotten to be produced.
