

## Cleaning firms

Ensure quality service with improved reports and employee management

### Are your employees' time sheets correct?

Illegible work slips and little mistakes can make it hard for your accounting dept. to record accurate information, bill customers, and calculate proper payroll.

### Do you know exactly when an employee is absent or late?

Is it only through an angry phone call from your customer, that you learn about missing staff? Do customers take advantage of incomplete verifications of work to dock your invoices?

### Do you comply with quality standards?

How do you ensure, that you are complying with your own quality standards and those of your customers? Are you, for example, certified in accordance with DIN EN ISO 9001?

### Are your costs high from making unnecessary damage payments?

Can you reduce liability risks by being able to verify the services you provide?

### Are your vehicle expenses too high?

Do you know exactly where and how long your vehicles are being used? Even after business hours and on the weekend?

### Can you guarantee the safety of your staff?

Do some employees work on their own? Can your employees quickly get in touch with you in an emergency?

## ENAIKOON telematics solution features

### Better scheduling

- improve work schedules by knowing at all times what the situation is
- data available at all times online

### Quality assurance

- real-time documentation of actual hours worked, allows you to respond immediately to exceptional situations
- you can immediately identify deviations from the planned work schedule

### Tamper-proof activity reports

- complete protocol outline and implementation at each work site
- complete monitoring of the time required at each work location
- verification that services have been performed in accordance with the contract
- verification of punctual arrival / completion of time-sensitive assignments

## inViu NFC-tracker features

### The application:

- gathering location data using NFC

### The components:

- employee equipment: NFC compatible Android mobile phone
- property equipment: Permanently installed NFC TAG
- analysis software

### The procedure:

- equip property with NFC TAGs
- select and equip the personnel
- the dispatch schedule of each employee is stored in inViu pro

### Bookings on site:

- view equipment location and movement
- track the beginning and end of assignments
- all data is archived, so it may be accessed later

### Asset tracking with mobile phones:

- unscheduled movement or route deviations are tracked and logged
- immediate notification by e-mail
- react to emergency situations quickly by staying informed

### inViu pro evaluation software:

- overview of all time / location-related details such as beginning and end of work, length of assignment
- evaluation per employee or user
- integration possibilities with accounting, scheduling software, etc..

## Useful add-ons

### Smartphone software inViu routes

- overview of the position of all trackables, like vehicles or employees, with the Android app inViu routes
- the exact location of all trackables on an integrated map
- more information like the actual address, actual timestamp, ignition on / off, and distance to your own position
- optimised individual preferences for a quick overview

## ENAIKOON's telematics overview

- offering a large selection of different telematics modules, creating customised solutions for almost any possible application
- wireless communication in real-time so you always know what's going on
- powerful and secure web-based solution with:
  - no software installation required
  - data retrieval via any web browser or on your mobile phone
- automatic e-mail and text message reports for ease-of-use
- evaluations put you in the know: driver log-book, daily and weekly reports about individual drivers or equipment, break times, and speed profiles

## Easy-to-use technology

- installation of the device within minutes
- maintenance-free operation with detailed manual
- hotline with local call charges

## Example for the application of ENAIKOON telematics
