

Garmin® nüvi® 465 Tpro

Integrated navigation device and telematics display for vehicles

The Garmin® nüvi® 465 Tpro was developed especially for trucks in the logistics industry.

In addition to the basic navigation function, the Garmin® nüvi® 465 Tpro can be used as a display for the telematics software application inViu pro with ENAIKOON messenger.

Navigation device features

the following important features are included in route planning for truck drivers:

- current clearance heights
- axle and gross vehicle weight
- nature of load
- clear lane assistance, that shows the correct lane to use at complicated intersections
- intelligent TMCpro – always up-to-date traffic
- written and spoken navigational directions
- create user-defined truck profile, which are adapted to the vehicle type and cargo
- bluetooth compatible with mobile phones, integrated microphones, or loudspeakers to create hands-free tools

Use as a telematics display

The Garmin® nüvi® 465 Tpro is ideally suited for telematics applications, that require continual communication between the driver and the dispatch.

The following display software support is integrated in the ENAIKOON locate-06 tracking devices as well as in the ENAIKOON applications ENAIKOON M2M-commsserver, and inViu pro:

- transport orders sent directly to drivers, via GPRS, and receipts of order confirmations from the drivers
- messages sent to drivers via GPRS and receipts of message deliveries from the drivers
- up to 20 status messages can be sent to each vehicle for later use
- status reports from the vehicle to the dispatch (e.g. traffic, loading time, accident, break, etc.)

Features

Housing

- size: 122 x 74 x 20 mm (4.80 x 2.91 x 0.79 in)
- touch screen surface

Weight

- 173 g (6.10 oz)

TFT display

- resolution: 480 x 272 pixel
- WQVGA-TFT color display, white background lighting
- display size: 97 x 57 mm (3.81 x 2.24 in)
- diagonal: 109 mm (4.3 in)

Battery

- rechargeable lithium ion battery
- up to 4 hours of operating time

Accessories

- 12 V / 24 V vehicle power cable
- integrated receiver for premium traffic information (TMC pro)
- dashboard holder for attachment to vehicle
- adhesive film
- USB cable

Memory capacity

- 1.000 way points, 15 routes in the integrated memory
- SD™ card slot (SD™ card is not included)
