ENAiKOON

ENAiKOON buddy-tracker
version 2.1

Stay connected and updated everywhere you go

ENAiKOON buddy-tracker is an application for Blackberry® and Windows® Mobile 6.5 smartphones with GPS, that allows you to track the current location of your trackables. You will know whether your vehicles, mobile workers, and assets are moving or static and how far they are located from you.

This application affords you complete PC independence.

All tracking devices sold by ENAiKOON and all ENAiKOON GPS applications for mobile phones and smartphones are fully supported.

Data changes in inViu pro are immediately reflected in the display of the ENAiKOON buddy-tracker.

Subaccounts in inViu pro are fully supported as well as ENAiKOON DGPS-enabler, the server side service to significantly improve the precision of GPS coordinates.

The application provides two views

Table with all trackables

the following information is shown in a table for all trackables registered to an inViu pro user account, each in a single line:

- name of the trackable
- distance from your mobile phone
- address of last reported GPS position
- timestamp of the last position r eport
- status "moving" or "static"

Details of one trackable

all available information is shown in full length for a single trackable:

- name of the trackable
- timestamp of the last position report
- distance from your mobile phone
- address of last reported GPS position
- status "moving" or "static"
- latitude of the GPS position
- longitude of the GPS position
