

## ENAIKOON display-56

Display for the recording and confirmation of data as well as clocking in-and-out with ENAIKOON driver-id

The ENAIKOON display-56 with driver-id reader and buzzer can be connected to the ENAIKOON locate-06.

It can be used in the following ways:

- entering numeric / alphanumeric data
- identifying a driver / machine operator, etc.
- display incoming requests from the dispatch, vehicle data, and important info, etc.

The device is fully compatible with the web portal inViu pro. There are numerous opportunities for both the configuration of the web-portal software and the telematics unit.

### Technical details

- LCD display with 4 lines of 20 characters
- display: 75 x 25 mm (3 x 1 in)
- 2 LEDs, programmable
- speakers
- size: 180 x 30 x 57 mm (7 x 1 x 2 in)
- color: blue
- operating voltage: 5 V to 31 V DC
- current consumption at 12 V: 60 mA (backlight on)
- current consumption at 12V: 20mA (backlight off)

### Applications

- entering numbers and letters: numbers, quantities, texts, messages, codes, job numbers, code numbers, etc.
- examples of text display: notes, driving jobs, warnings if there are vehicle problems, references to tyre changes, oil changes, safety inspections, etc.
- warning alarms when something needs immediate attention like speeding, temperature too high or low, fuel consumption too high, engine light on, call dispatch, etc.
- trip destinations and reasons can be entered directly into the inViu pro driver logbook

### Uses in conjunction with ENAIKOON driver-id

- employee clock in-and-out over ENAIKOON driver-id reader
- warning alarm if clock in not successful
- the integrated speakers of the ENAIKOON display-56 will give an acoustic signal when the ignition is turned on without an ENAIKOON iButton being successfully read by the ENAIKOON driver-id
